

HellermannTyton Category 5e Modular Keystone Jacks

- Patented design uses innovative crosstalk cancellation technology
- Provides sufficient margin over TIA category 5e requirements
- Unique strain relief design secures cable terminations
- Configured with both 568A and 568B wiring schemes
- Individually bagged

HellermannTyton Category 3 Modular Keystone Jacks

- Designed to give maximum performance in category 3 applications
- Unique strain relief design secures cable terminations
- Available in an 8 position, 8 conductor USOC connector or a 6 position, 6 conductor USOC connector; they ensure the most reliable connection for voice and data applications
- 6 position jack can be wired as RJ-11C, RJ-14C, or RJ-25C

Pass Through Wall Plate

Ideal for home theater and commercial sound applications where multiple cables are to pass through a wall, and not terminated at the plate. Perfect when pre-terminated cables, such as optical fiber, are routed through the wall, or when large numbers of cables make termination at the wall plate impractical. Hole diameter is approximately 1", and cables are angled at 90°, allowing equipment to be placed close to the wall. Rigid ABS plates are standard single gang size, include matching screws, and are available in white or ivory.

NEW! NEW! NEW!

Splitport™ Cable Pass-Through Plates

Ideal for wiring installations where multiple cables are to pass through a finished wall, and not terminated at the plate. Perfect when pre-assembled or fiber cable is routed through walls, or when large numbers of cables make termination at the wall plate impractical. Split plate design eases cables terminated with large connectors and enables plate to be installed after all connections are made. Available in white, ivory, black and almond.

MCM CUSTOM AUDIO

Five Channel Wall Speaker Plate

Ideal when setting up any home theater room, where front, rear and center channel speaker wire is to be located inside of the walls. Decora style, double gang wall plate utilizes low-profile banana jacks, providing connection for five speakers. Gold plated connections are color-coded red/black and will accept up to 10AWG wire or banana plugs on either side. Front of plate is labeled **Front:** Left, center and right **Rear:** Left and right. Includes decora style cover, white color.

MCM CUSTOM AUDIO

Speaker Distribution Wall Plates

Essential for distributed residential sound installations, these plates provide a convenient method of connecting numerous pairs of speakers to a single pair of binding posts. Allows bulky wire bundles to be located inside the wall and out of sight. Each plate features detachable terminal strips for ease of connection at the pre-wire stage. High-quality screw terminals accept up to 14AWG wire. Heavy-duty gold plated brass binding posts accept single or paired banana plug or bare-wire connection. Available in four, eight and ten pair configurations. Includes rigid decora style cover plate. White color. **Note:** Plates are straight parallel connection and provide no impedance protection. These must be used with impedance matching volume controls, such as #50-6570.

Order #	Speaker Pairs	Size	(1-3)	(4-up)
50-7400	Four	Single gang	\$19.95	\$17.95
50-7402	Eight	Double gang	34.95	31.25
50-7404	Ten	Double gang	39.95	36.95

Security Key Switches and Station Plates

Key switches are rated for 2.8A at 24VDC and 15A at 48VAC. Brass contacts provide longer life. Station plates are brushes satin aluminum with 6-12VDC operating voltage. Designed for single gang box installations.

E	26-505	Momentary contact key switch	1.43

Buildable Wall Plate System

Allows complete flexibility when configuring complex combinations of connectors for home theater wall plate installations. Single gang decora inserts, which are available in white, ivory and bone, are mounted to a rigid metal frame, for guaranteed reliability. Plates are available as blank, or with one through six hex openings, allowing insertion of a variety of connectors. All plates are compatible with single and multi gang decora covers, and mount to conventional electrical boxes and similar low voltage devices.

Order #	Hex Openings	Color	(1-3)	(4-up)

Carlson® Old Work Low Voltage Wall Mounting Brackets

Ideal for any home theater or security application, these brackets accept any single or dual gang wall plate. May be used for any Class 2 low voltage wiring application that does not require an electrical box. Open back design provides easier routing of cables, especially larger diameter coax. For old work applications, these units include rotating clips to securely attach to existing wallboard. Only tools required are a drywall saw and Philips head screwdriver.

Order #	Description	(1-3)	(4-9)	(10-up)
28-17175	Single gang	\$1.49	\$1.25	\$1.19
28-17180	Double gang	1.99	1.75	1.59

Carlson® Low Voltage Wall Mounting Brackets

Ideal for any home theater or security application, these brackets accept any single or dual gang wall plate. May be used for any Class 2 low voltage wiring application that does not require an electrical box. Open back design provides easier routing of cables, especially larger diameter coax. For new work applications only, these units include captive nails, and large mounting tabs, allowing use with metal or wood studs.
